SALESFORCE CERTIFIED

Platform Developer I

Career Objective

Having 1.1 years of experience as a Salesforce Developer in IT industry and I would like to continue my career in Salesforce Platform to obtain a creative and challenging position in an organization to continually upgrade my technical skills and knowledge.

Professional Summary

- Salesforce Certified Platform Developer 1
- Having a Hands-on experience in configuring application using declarative and programmatic approach on salesforce.com platform.
- Experience in salesforce development and lightning UI using LWC, APEX classes, Apex Triggers, Test Classes.
- Hands on Experience in Salesforce Lightning configuration & customization to have better look and feel of the Salesforce application.
- Experience in deployment using Change set, Workbench.
- Have an extensive experience on security and Sharing, Roles, Profiles, Permission Sets, OWD settings.
- Designing & developing Apex classes & Lightning web components, to implement custom business logic for various functionalities.
- Declarative customization including the creation of flow, Approval Processes, Validation Rules, Workflow rules, Reports and Dashboards.

Professional Experience

Organization: Persistent Systems (from feb 2022)

- o Project Title: IDFC First Bank
  Description: This is a loan processing application that is used to provide the loan. It provides different types of loans such as education loans, personal loans, vehicle loans, and loans against property. Sales agents are going to use this app. Sales agents fill up all the details which are required for the loan from the person who wants the loan and then save the details. After that CPA (Certified public accountant) is another user to verify all the details which are filled in by the sales agent. He decides whether to proceed further or not, Once CPA verified all details, he passes it to UW(Underwriter) user. Underwriters are responsible for approving or rejecting the borrower's loan application based on whole details and amounts calculations.

Developer Responsibilities:

- Apex classes to support the custom functionality, Debug analysis and Production Bugs.
- Classes go through developer console.
- SFDC analysis through API integration and configuration.
- Development and Design.
- Business requirements gathering.
